Maske long-term vehicle rental

Our aim. Your mobility.

As your mobility and servicing partner, Maske Fleet GmbH offers modern vehicle fleet solutions for traders and businesses. With our many years of experience, we develop custom mobility concepts to match today's requirements. Whether car, van or light utility vehicle – long-term rental from Maske Fleet GmbH ensures full service where your vehicle is concerned. The company is also developing e-mobility solutions. Mobility means flexibility and individuality. We offer a broad range of ultra-modern electric vehicles for long-term rental. Our range runs from small vehicles through limousines to vans and transporters

Our concept

Fast. Flexible.

Mobility demands are constantly changing, while need is ever on the rise. Our concept unites rapid availability and flexible running times. You can obtain the right vehicle for your individual needs from a rental period of 1 month and onward. Our "one price, all included" principle guarantees you full cost control. In all areas, a personal contact will be at your side.

Our services

Simple. Individual. Future-oriented.

With our FlexiRent and SelectRent products, Maske Fleet GmbH offers you mobility to suit your needs. We supply interim solutions, company cars fitted out as requested or individual shelving installations for your utility vehicle. As a manufacturer-independent supplier, we have a wide range of immediately available vehicles ready for you. With a keen eye on the future, we have incorporated electric vehicles into our fleet since 2016. Get started from a rental period of 1 month with flexibility and ease, thanks to our "one price, all included" principle.

Maske Fleet GmbH

Not living in the past. Ready for tomorrow.

Mobility lives on dynamism. And this arises in the car rental field above all due to changing customer demands. To do well, you have to keep up. We have been doing this since 1959. The further development of our range and continuous extension of our expertise have determined what we do ever since. In this way, we are positioning ourselves consciously on the market of today and acting dynamically in the interests of the customer.

First a minibus. Then a large company.

What started with the acquisition of a VW minibus by Eckhard Maske, has grown into a mid-size family firm with locations in Germany and Austria and is today a subsidiary of the international Hitachi Capital Corporation. The core and driver of this history of success have always been our employees. From adjusting all conditions to offering full-scale support for the whole duration of the rental, they and their specialist knowledge are always available – wherever your journey is taking you

Alternative drive technologies are marking out a new period in the successful history of the company. Innovative and future-oriented, Maske Fleet GmbH is constantly updating its range and its fleet.

Maske MietCenter

Off to a good start. Always getting there.

It is the starting-point for long-term vehicle rental, a centre for comprehensive servicing jobs, a base for care-free mobility: the Maske MietCenter. Here, we work on cars by any manufacturer and are the service partner at your side 24/7. From tyre servicing to damage reporting and complex conversions, a direct contact is always only a few kilometres away. With our country-wide network of MMCs, we are certain to be there for you when you need us.

Tailor-made

Mobility for your success.

With our available range of long-term vehicle rentals, we support companies in their successful development. That is why we have developed sector-specific solutions. Our team not only organises the standard vehicle services for this but also provides other options such as special installations or vehicle labelling to customer specifications.

Vehicle requests can be made personally via our homepage. All processes can be completed without bureaucratic fuss and quickly. Within 24 hours we can provide you with the desired vehicle – wherever you are in Germany. We have the right vehicle for every purpose. For particular projects or in busy months, we support our customers with offers of additional vehicles. The rental duration and mileage can be selected as desired, creating maximum flexibility. If the needed for longer than originally thought – no problem: rental duration can be extended without complication. Mobility is changing. Alongside the classical combustion engine, the electric battery is gaining importance. With our electric vehicle expertise, we are already making the first steps into the future.

The vehicles

Many possibilities. Right choice guaranteed.

The vehicle has to be right. It has to fit personal wishes, ideas and goals. Otherwise, vehicle-based mobility is just a means to an end. To avoid this, at Maske Fleet you can choose between different manufacturers, various types of vehicles and in SelectRent between various different fit-outs. And not only passenger cars: With over 50 percent of our range in the utility vehicle class, we have established ourselves as experts in the rental of commercial vehicles. Mobility is no more a means to an end but an end in itself.

With over 50 per cent of our range in the utility vehicle class, we have established ourselves as experts in commercial vehicle rentals.

>>> We are brand-independent.
Mobility lives from getting the right vehicle
